

Capabilities Statement

Programatics (PMX) helps partners increase performance and decrease variability through disciplined change management services including detailed analyses, process improvement, project and program management, and systems engineering. PMX provides expert analysis and planning activities ranging from strategic design to tactical execution. Based on our team’s years of results driven experience, we leverage commercial best practices to tailor expertise and insight for your unique requirements.

Delivering results with our Military Veteran, Fully Cleared, and Polygraphed staff, PMX key lines of business include managing information technology, supply chain, and acquisition initiatives forming an expertise “Zen Zone” for our customers.
